# A DEFINING MOMENT IN AUTOMOTIVE PROTECTION

FEYNLAB® ULTRA V3 represents the next evolution of our proprietary biphasal ceramic technology. Extensively tested through both controlled laboratory analysis and real-world application, FEYNLAB® ULTRA V3 delivers a true step forward in every category that defines a premium ceramic coating.

By combining years of research, measured data, and field experience, FEYNLAB® ULTRA V3 pushes the limits of durability, hydrophobic performance, and self-cleaning behavior – while delivering exceptional UV resistance and chemical protection. The result is a coating that sets a new industry benchmark for water behavior and long-term surface protection.

## ADVANCED BIPHASAL CHEMISTRY

When developing a coating that excels simultaneously in durability, chemical resistance, hydrophobicity, gloss, and surface slickness, a true base-and-topcoat architecture is essential. FEYNLAB's® biphasal chemistry accomplishes this by seamlessly integrating two complementary systems into a single, refined application process.

This unified design reduces installation complexity while increasing consistency and long-term performance. With fewer steps and fewer variables, there is less room for error – while ensuring the coating is chemically bonded as a complete system. Unlike traditional coatings that rely on sacrificial topcoats, FEYNLAB® ULTRA V3 maintains its water behavior and surface characteristics for the full lifespan of the coating.

FEYNLAB® ULTRA V3 is engineered to outlast and outperform competing 5-year ceramic coatings on the market today.

## FEATURES

### UV RESISTANT

FEYNLAB® coatings provide industry-leading UV protection, helping preserve gloss, clarity, and finish integrity over time.

### SELF-CLEANING

Ultra-high water contact angles combined with an optimized slide angle deliver the most effective self-cleaning behavior FEYNLAB® has ever achieved—keeping vehicles cleaner for longer with less maintenance.

### DURABLE

Formulated with premium raw materials and proprietary chemistries, FEYNLAB® ULTRA V3 is designed to withstand harsh environments and long-term exposure.

### WATER BEADING ANGLE

FEYNLAB® ULTRA V3 achieves an **average water contact angle of 113°**, an exceptional figure compared to industry-leading ceramic coatings that typically range between **97°–106°**. This dramatic increase translates directly into superior self-cleaning performance, allowing water, dirt, and contaminants to release more easily from the surface than ever before. Simply put, FEYNLAB® ULTRA V3 is the most self-cleaning coating we have engineered to date.
